01 PROFILE

As an energetic software engineering student at Moringa School, I've mastered coding, problem-solving, and system administration. My passion for technology led me to create a home lab featuring a DIY NAS running on Linux Ubuntu Server with Casa OS, complemented by a web-based Docker GUI. Additionally, I'm a skilled full-stack developer, having created multiple websites and web applications. My diverse skill set and hands-on experience showcase my versatility, and I'm eager to apply these skills in a professional work environment.

I am seeking opportunities where I can utilize my expertise in software development, system administration, and full-stack development to contribute meaningfully to innovative projects. I am eager to collaborate with dynamic teams and make a positive impact in a challenging and growth-oriented environment.

02 EDUCATION

Sep 2023 — Present
Nairobi

**Moringa School,
Software Engineering.**

I'm currently a software engineering student at Moringa School, where I've gained valuable experience in diverse aspects of the field. Currently pursuing internship opportunities to apply acquired skills and knowledge in real-world projects.
